

Pre-Bid clarification

Doubt: As per your BOQ, you have asked for Rally Plus system with white mic pods but as per OEM, Rally plus system by default comes with Graphite Mic pods as the speaker provided in the system is also graphite color.

In Order to have color uniformity in the room, OEM Has suggested to go with Complete Graphite color.

Can you please clarify on your color choice?

Clarification: As per the official Logitech site, the rally plus system bundle is listed with white mic pods only. However, OEM support the graphite mic pods version as well. So, in this context, color variation can be considered a minor deviation.
