

Addendum III

Subject: Addendum III for Tender Reference No. RICB/CO/GAD-STORE (01)/2024/12413

RICB would like to notify all eligible Bhutanese firms of the following changes to the eligibility criteria for the Supply, Delivery, Installation, Configuration and Commissioning of Core Routers, Firewalls, Core Switches and Access Switches for Data Center - LOT I

9.13. Technical requirement for Lot I

1. Core Router Specifications

Original Requirement:

Number of SSL VPN user support is 500

Should have stateful firewall feature from Day 1 and support IPS, Application Visibility and Control and Advanced Thread Prevention feature with license upgrade.

Should support secure and flexible remote access SSL VPN with end device client

Proposed solution should be certified by ICSA Labs for Advanced Thread Defense (ATD) for 100% malware block rate with 0.5% false positive during the Q4 2022 test cycle

Amendment:

The above original requirements are of Firewall and are not applicable for the core router.
